

Precise Calibration

Precise Calibration provides a comprehensive range of calibration, repair and testing services in our core facilities located in Perth and Brisbane, or in our Mobile Calibration Facility.

We offer traceable calibrations to Australian National Standards. All calibration reports are issued in compliance with ISO/IEC 17025 and we are able to offer fast turnaround times to our customers.

Whether it is one off calibrations or a regular calibration program to meet your ISO9000 quality system requirements, Precise Calibration can help you with all your calibration needs.

Our calibration software allows Precise Calibration to generate a recall report to inform our customers when equipment is due for calibration.

Our comprehensive service covers the following fields:

- > Electrical
- > Pressure
- > Temperature
- > Torque
- > Mobile Onsite Testing
- > PPE Equipment Testing

If your equipment is not listed on this flyer do not hesitate to contact us directly to see if it can be calibrated.

Electrical

- › Analogue and Digital Multimeters
