

WHO WE ARE

Seamless Resourcing specialise in multi-disciplined verification, testing, commissioning and completions services on Oil and Gas, Mining and Metals, Utility and Infrastructure projects throughout the Asia Pacific Region.

As part of Present Group; Seamless Resourcing has more than 10 years experience in successfully supporting and delivering major projects. In this time we have developed and refined the 4 resource requirements needed for any project.

PEOPLE

We attract and retain the best personnel in their respective fields due to our unique social culture and high levels of employee satisfaction. With the right people on board, we can quickly deploy personnel and resources to support any project; People; Plant & Equipment; Procedures & Proformas; Platform regardless of size, location or complexity.

Working independently, or as part of an integrated team; Seamless Resourcing typically provide:

- Commissioning and Completions Management
- Commissioning Engineers
- Commissioning Supervisors and Superintendents
- Commissioning and Completions Technicians.

PLANT AND EQUIPMENT

Seamless Resourcing offer a complete range of test and measurement equipment to accompany our services, in partnership with Precise Facilities. We can offer everything from a single pressure calibrator, through to complete onsite calibration labs and managed tool stores.

PROCEDURES AND PROFORMAS

Seamless Resourcing has developed an extensive library of guidelines, procedures and proformas, ranging from high level commissioning methodologies, to detailed inspection and test records.

PLATFORM

Utilising an in-depth evaluation process Seamless Resourcing can offer a CMS (Completions Management System) to suit any project requirements. We have a new generation CMS that will deliver the flexibility and governance in the timeframes required.

With a proven track record and reputation throughout the industries that we work in, Seamless can provide the resources required to deliver above expectation and always with the projects best interest in mind.

PRESENT GROUP

In line with our stated purpose of becoming the ONE commissioning completions group, Powertech has been transformed into a new entity known as the Present Group. When we have a PASSION for what we do and TRUST in one another, only then do we become both naturally ALIGNED and fully ENABLED.

Over the years we have aspired to become our clients most trusted servants, many have become our friends. These friendships have grown from mutual trust and collaborative understanding. This is one of our greatest rewards and we will continue to promote a friendly cooperation in all our relationships, within and throughout our Group of Companies.

In some ways the Present Group has emerged ready formed and each of the four new domains; Consulting, Resourcing, Services & Facilities thoroughly complement one another. This degree of differentiation is an essential transformation if we are to realise our purpose in becoming the ONE Commissioning Completions Group.

Our WHY drives an acute sense of purpose to remove and reduce chronic wastage of natural resources. To this end we believe we can impact in the world's largest industry sectors currently engaged in major energy, resource and infrastructure projects. The stakes are not only highest from an economic standpoint but more importantly from an environmental one.

Headquartered in Perth Western Australia, the Present Group comprises a national network with offices and branches stemming into QLD, VIC and NSW. With a client base comprising BHP Billiton, Rio Tinto, Xstrata, Woodside, Chevron, Santos, Origin and a project portfolio that includes renewables, power stations, desalination, platforms, refineries, mines, ports and rail, the Present Group's collective experience is without parallel.
